

British Shorthair																	
Body	The medium to large sized cat is muscular and cobby. Chest, shoulders and back are broad and massive. Legs are short and muscular; paws thick and round. The tail is medium long and thick with a rounded tip and reaches to the shoulders. The neck is short and strong.																
Head	The head is rounded, massive, broad with a firm chin. The nose is short, broad and straight. The profile is curved (without any stop). Cheeks are full and pronounced. The large round whisker pads lend a distinct outline to the short muzzle.																
Ears	The ears are medium in size, broad at the base, with slightly rounded tips. They are set wide apart.																
Eyes	The eyes are large and round, set wide apart. Eye colour corresponds with coat colour.																
Coat	The coat is short and very dense, not close lying. It stands away from the body like plush due to the sufficient undercoat. The texture is not woolly, it is crisp.																
Colour varieties	All colours and point colours without white are recognized. The description of colours is listed in the general list of colours.																
Faults	<ul style="list-style-type: none"> A profile with a stop is a severe fault.
